

RITHIKA R

Full-Stack (MERN) Developer • Generative AI Enthusiast • React.js • Node.js • MongoDB • Python

Coimbatore, Tamil Nadu | rithikarajar@gmail.com | +91 8190979383 | www.linkedin.com/in/rithikar86 | github.com/rithikar86

SUMMARY

Final-year B.Tech Information Technology student (2027) passionate about designing and developing scalable full-stack web applications(MERN) and AI-powered solutions. Proficient in React.js, Node.js, Express.js, MongoDB, JavaScript, HTML, CSS, and Python in building end-to-end applications and integrating REST APIs. Experienced in developing Generative AI applications using LangChain, Retrieval-Augmented Generation (RAG), FAISS DB, Ollama, and Llama 3.2. Strong foundation in data structures, algorithms, object-oriented programming, and database management, with practical knowledge of Git, GitHub. A collaborative team player with strong problem-solving, analytical thinking, communication, and adaptability skills, committed to building reliable, user-focused software .

TECHNICAL SKILLS

Languages: Python, JavaScript

Frontend / Backend: React.js, HTML5, CSS3, Express.js

Databases: MongoDB

APIs & Practices: REST APIs, JSON, Git, GitHub

AI / ML: GenAI, RAG, LLMs, NLP, LangChain, FAISS DB, Ollama

PROJECTS

Private Document Intelligence AI | *LangChain, FAISS, Ollama, RAG, LLMs*

- Built a local AI application to query PDF documents using natural language.
- Used LangChain to connect the LLM, document loader, text splitter, and retrieval pipeline.
- Used FAISS to convert document chunks into vector embeddings and perform semantic search.
- Integrated Ollama with Llama 3.2 to run the language model locally without cloud APIs.
- Implemented Retrieval-Augmented Generation (RAG) to retrieve relevant document content before generating answers.

CIETM Conference Management System | *MongoDB, Express.js, React.js, Node.js, JavaScript, REST APIs*

- Developed a full-stack web application for managing the CIETM-2026 National Level Conference, providing separate interfaces for participants and administrators.
- Built responsive user interfaces using React.js and integrated them with REST APIs developed using Node.js and Express.js.
- Designed and managed MongoDB collections to store participant registrations, paper submissions, event details, and user information.
- Implemented registration forms, paper submission workflows, and admin modules for managing conference data.
- Developed CRUD operations for participants, events, and submissions with seamless frontend-backend integration.

Customer Segmentation (RFM Analysis) | *React, Tailwind CSS, Node.js, Express, MongoDB, and Python (for RFM analysis and segmentation logic).*

- Developed a customer segmentation system using RFM (Recency, Frequency, Monetary) Analysis generated product recommendation
- Used Pandas and NumPy for data cleaning, preprocessing, and analysis and visualized customer analysis using Matplotlib, Stored customer transaction data in MongoDB.
- Segmented customers into High-Value, Loyal, Potential, and At-Risk groups.

Movie Search Application | *React.js, REST APIs, JavaScript, CSS3*

- Developed a movie search application using React.js.
- Integrated a third-party REST API to fetch movie details based on user search.
- Created reusable React components for the search bar, movie cards, and movie details.
- Implemented debounced search to reduce unnecessary API requests and Designed a responsive user interface using HTML and CSS.

Women Safety App | *Android Studio, Java, Firebase, Google Maps API, GPS*

- Developed an Android application to enhance women's safety by providing emergency assistance features.
- Implemented a double-shake detection feature that automatically triggers an SOS alert.
- Integrated GPS and Google Maps API to capture and share the user's live location with registered emergency contacts.
- Enabled automatic SMS notifications and a loud emergency alarm to alert nearby people within approximately a 10-meter radius.
- Designed a simple and user-friendly interface for quick access to emergency features during critical situations.

INTERNSHIP EXPERIENCE

Software Development Intern — Cognifyz Technologies (Virtual) *Sep–Oct 2025*

- Developed software features and completed assigned development tasks during the internship.
- Debugged and fixed application issues using JavaScript and Python.

UI/UX Design Intern — Zop Technologies, Kodaikanal *Jun–Jul 2025*

- Designed interactive prototypes for the Isha CallTaxi mobile application.
- Conducted basic user research to improve application navigation and user experience.
- Designed wireframes and interactive prototypes for the **Isha CallTaxi** mobile application using **Figma**.

ACHIEVEMENTS & TECHNICAL ACTIVITIES

- **2nd Prize – She Hacks Hackathon** / *Women Empowerment Cell*
Developed a Women Safety App as part of a team, focusing on technology-driven solutions for women's safety.
- **National Level Technical Symposium – Elect-Era'26** / *CIT*
Participated in Brain Teaser, AI Mimic, and Mirror the Web events, gaining hands-on exposure to problem-solving, AI concepts, and front-end web development.
- **National Science Day – Paper Presentation** / *Institution's Innovation Council (IIC)*
Presented a technical paper, strengthening research, technical presentation, and communication skills.
- **Hackathon Participant – Centralized Platform Student Hub Portal**
Collaborated in developing a Student Hub Portal to manage academic and non-academic student activities through a centralized platform.

EDUCATION

- B.Tech, Information Technology — Coimbatore Institute of Engineering and Technology (2023–2027) | 87%
- Senior Secondary (XII), Tamil Nadu State Board (2023) | 82%
- Secondary (X), Tamil Nadu State Board (2021) | 80%

CERTIFICATIONS & TRAINING

- | | |
|--|----------------------------|
| ● Full Stack Development | <i>HCL GUVI</i> |
| ● Data Structures & Algorithms in Python | <i>Simplilearn SkillUp</i> |
| ● Generative AI | <i>GUVI</i> |
| ● NLP | <i>Infosys Springboard</i> |
| ● NSS Certified | <i>CIET</i> |
